Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date | 15 October 2022 |
|---------------|--|
| Team ID | PNT2022TMID23501 |
| Project Name | Real-Time Communication System Powered by AI for Specially Abled |
| Maximum Marks | 4 Marks |

Functional Requirements:

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task) |
|-----------|-------------------------------|--|
| FR-1 | User communication | User Must Know the Sign Language |
| FR-2 | User communication | The user Has to communicate in Front of the Camera |

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional | Description |
|--------|----------------|--|
| | Requirement | |
| NFR-1 | Usability | The camera captures all expressions |
| | | including facial expressions and hand |
| | | gestures which can be easily used by all |
| | | age groups. |
| NFR-2 | Reliability | The system is very liable, it can last for |
| | | long amounts of time if well maintained. |
| NFR-3 | Performance | The cost-effective nature of the system |
| | | makes it extremely liable and thus, |
| | | efficient. |
| NFR-4 | Availability | The solution fits all the sign languages |
| | | when we train the model for all the sign |
| | | languages. So, it is used by all the |
| | | countries with different languages. |

| NFR-5 | Scalability | The system gives output rapidly. It also predicts quickly when it gets so many inputs at a time. It predicts different types of sign language at a time. |
